

Building and Grounds Report for July, 2015

I have purchased the paint for the pump house that was repaired last month, but because I have been busy and the weather is pretty hot I have not painted it yet.

I made and installed wooden dividers in a drawer in the dental lab to separate medical emergency supplies

The new cabinets in exam rooms three and four are now installed and functioning as anticipated.

If you have been to the clinic in the last three weeks you probably noticed what a nice job someone did with getting the weeds whacked down. We all owe this person (Vanessas' father) our thanks. Especially me since I didn't get around to doing the job.
